

Function				API Definition								
Cluster	Operation	Variant	AFD structure	Meaning	Method	Path / Endpoint	Function variant (APNVAR code)	Request payload	Request function	Parameters (query)	Response payload (* = payload not required)	Response function
claim	new	<default>	claimStructure	First notification of loss (FNOL), initial creation of the claim file.	POST	/claims/new	A0300 - newClaim	claimStructure	newClaim_request		claimStructure	newClaim_response
claim	new	registration	claimStructure	Registration of a new claim with an automatic underwriting.	POST	/claims/registration	A0302 - newClaimRegistration	claimStructure	newClaimRegistration_request		claimStructure	newClaimRegistration_response
claim	new	financialTransaction	claimStructure	Add booking details to a claim, such as invoices from repairers for completed work.	POST	/claims/{claimId}/financial-transaction	A0306 - newClaimFinancialTransaction	claimStructure	newClaimFinancialTransaction_request		claimStructure	newClaimFinancialTransaction_response
claim	change	<default>	claimStructure	Replace the entire claim by a new version.	PUT	/claims/{claimId}/change	A0310 - changeClaim	claimStructure	changeClaim_request		claimStructure	changeClaim_response
claim	change	correction	claimStructure	Replace the entire claim file by a new version due to wrong input.	PUT	/claims/{claimId}/correction	A0312 - changeClaimCorrection	claimStructure	changeClaimCorrection_request		claimStructure	changeClaimCorrection_response
claim	change	detail	claimStructure	Apply a partial change to the claim. Changing the status of a claim: - Transfer the claim handing to the carrier of the policy. - Reactivate a claim that has previously been closed. - Close a claimfile (resetting settlement reserves to zero). - Closing of a claim due to absence of policy coverage. - Reject a claim - Renown a claim	PATCH	/claims/{claimId}/detail	A0314 - changeClaimDetail	claimStructure	changeClaimDetail_request		claimStructure	changeClaimDetail_response
claim	change	status	claimStructure	Apply a partial change to one or more contracts within a master agreement. - Transfer the claim handing to the carrier of the policy. - Reactivate a claim that has previously been closed. - Close a claimfile (resetting settlement reserves to zero). - Closing of a claim due to absence of policy coverage. - Reject a claim - Renown a claim	PATCH	/claims/{claimId}/change/status	A0318 - changeClaimStatus	claimStructure	changeClaimStatus_request		claimStructure	changeClaimStatus_response
claim	retrieve	<default>	claimStructure	Obtain full details of a single claim based on the unique reference.	GET	/claims/{claimId}/retrieve	A0350 - retrieveClaim				claimStructure	retrieveClaim_response
claim	retrieve	status	claimStructure	Obtain status information of a single claim by a unique reference.	GET	/claims/{claimId}/retrieve/status	A0352 - retrieveClaimStatus				claimStructure	retrieveClaimStatus_response
contract	new	<default>	loanStructure	Application for a loan to be underwritten and processed.	POST	/loans/new	A0010 - newContract	loanStructure	newContract_request		loanStructure*	newContract_response
contract	new	<default>	masterAgreementStructure	Application for a master agreement to be underwritten and processed.	POST	/master-agreements/new	A0010 - newContract	masterAgreementStructure	newContract_request		masterAgreementStructure*	newContract_response
contract	new	<default>	masterAgreementStructure	Application for a subcontract of a master agreement to be underwritten and processed.	POST	/master-agreements/{masterAgreementId}/new	A0010 - newContract	masterAgreementStructure	newContract_request		masterAgreementStructure*	newContract_response
contract	new	<default>	pensionStructure	Application for a pension to be underwritten and processed.	POST	/pensions/new	A0010 - newContract	pensionStructure	newContract_request		pensionStructure*	newContract_response
contract	new	<default>	policyStructure	Application for a policy to be underwritten and processed.	POST	/policies/new	A0010 - newContract	policyStructure	newContract_request		policyStructure*	newContract_response
contract	new	basedOnOffer	loanStructure	Conversion of a loan offer into a contract.	POST	/loans/offers/{offerId}/based-on-offer	A0012 - newContractBasedOnOffer	loanStructure	newContractBasedOnOffer_request		loanStructure*	newContractBasedOnOffer_response
contract	new	basedOnOffer	masterAgreementStructure	Conversion of a master agreement offer into a contract.	POST	/master-agreements/offers/{offerId}/based-on-offer	A0012 - newContractBasedOnOffer	masterAgreementStructure	newContractBasedOnOffer_request		masterAgreementStructure*	newContractBasedOnOffer_response
contract	new	basedOnOffer	masterAgreementStructure	Conversion of a subcontract of a master agreement offer into a contract.	POST	/master-agreements/{masterAgreementId}/offers/{offerId}/based-on-offer	A0012 - newContractBasedOnOffer	masterAgreementStructure	newContractBasedOnOffer_request		masterAgreementStructure*	newContractBasedOnOffer_response
contract	new	basedOnOffer	pensionStructure	Conversion of a pension offer into a contract.	POST	/pensions/offers/{offerId}/based-on-offer	A0012 - newContractBasedOnOffer	pensionStructure	newContractBasedOnOffer_request		pensionStructure*	newContractBasedOnOffer_response
contract	new	basedOnOffer	policyStructure	Conversion of a policy offer into a contract.	POST	/policies/offers/{offerId}/based-on-offer	A0012 - newContractBasedOnOffer	policyStructure	newContractBasedOnOffer_request		policyStructure*	newContractBasedOnOffer_response
contract	new	notification	masterAgreementStructure	Notification of master agreement details to third parties who provide supporting services.	POST	/master-agreements/notification	A0014 - newContractNotificationThirdParty	masterAgreementStructure	newContractNotificationThirdParty_request		masterAgreementStructure*	newContractNotificationThirdParty_response
contract	new	notification	masterAgreementStructure	Notification of details of a subcontract of a master agreement to third parties who provide supporting services.	POST	/master-agreements/{masterAgreementId}/notification	A0014 - newContractNotificationThirdParty	masterAgreementStructure	newContractNotificationThirdParty_request		masterAgreementStructure*	newContractNotificationThirdParty_response
contract	new	notification	policyStructure	Notification of policy details to third parties who provide supporting services.	POST	/policies/notification	A0014 - newContractNotificationThirdParty	policyStructure	newContractNotificationThirdParty_request		policyStructure*	newContractNotificationThirdParty_response
contract	new	offer	loanStructure	Offer for a loan.	POST	/loans/offer	A0016 - newContractOffer	loanStructure	newContractOffer_request		loanStructure*	newContractOffer_response
contract	new	offer	masterAgreementStructure	Offer for a master agreement.	POST	/master-agreements/offer	A0016 - newContractOffer	masterAgreementStructure	newContractOffer_request		masterAgreementStructure*	newContractOffer_response
contract	new	offer	masterAgreementStructure	Offer for a subcontract of a master agreement.	POST	/master-agreements/{masterAgreementId}/new/offer	A0016 - newContractOffer	masterAgreementStructure	newContractOffer_request		masterAgreementStructure*	newContractOffer_response
contract	new	offer	policyStructure	Offer for a policy.	POST	/policies/offer	A0016 - newContractOffer	policyStructure	newContractOffer_request		policyStructure*	newContractOffer_response
contract	new	offerOnContract	loanStructure	Offer for a change of a loan contract.	POST	/loans/{loanId}/offer-on-contract	A0018 - newContractOfferOnContract	loanStructure	newContractOfferOnContract_request		loanStructure*	newContractOfferOnContract_response
contract	new	offerOnContract	masterAgreementStructure	Offer for a change of a master agreement contract.	POST	/master-agreements/{masterAgreementId}/offer-on-contract	A0018 - newContractOfferOnContract	masterAgreementStructure	newContractOfferOnContract_request		masterAgreementStructure*	newContractOfferOnContract_response
contract	new	offerOnContract	masterAgreementStructure	Offer for a change of a subcontract of a master agreement contract.	POST	/master-agreements/{masterAgreementId}/contracts/{contractId}/offer-on-contract	A0018 - newContractOfferOnContract	masterAgreementStructure	newContractOfferOnContract_request		masterAgreementStructure*	newContractOfferOnContract_response
contract	new	offerOnContract	pensionStructure	Offer for a change of a pension contract.	POST	/pensions/{pensionId}/offer-on-contract	A0018 - newContractOfferOnContract	pensionStructure	newContractOfferOnContract_request		pensionStructure*	newContractOfferOnContract_response
contract	new	offerOnContract	policyStructure	Offer for a change of a policy contract.	POST	/policies/{policyId}/offer-on-contract	A0018 - newContractOfferOnContract	policyStructure	newContractOfferOnContract_request		policyStructure*	newContractOfferOnContract_response
contract	new	rate	loanStructure	Calculate rate for a loan. Request data and calculation result are not required to save.	POST	/loans/rates/application	A0020 - newContractRate	loanStructure	newContractRate_request		loanStructure*	newContractRate_response
contract	new	rate	masterAgreementStructure	Calculate rate for a master agreement. Request data and calculation result are not required to save.	POST	/master-agreements/rates/application	A0020 - newContractRate	masterAgreementStructure	newContractRate_request		masterAgreementStructure*	newContractRate_response
contract	new	rate	masterAgreementStructure	Application for a subcontract of a master agreement to be underwritten and processed.	POST	/master-agreements/{masterAgreementId}/rates/application	A0020 - newContractRate	masterAgreementStructure	newContractRate_request		masterAgreementStructure*	newContractRate_response
contract	new	rate	pensionStructure	Calculate rate for a pension. Request data and calculation result are not required to save.	POST	/pensions/rates/application	A0020 - newContractRate	pensionStructure	newContractRate_request		pensionStructure*	newContractRate_response
contract	new	rate	policyStructure	Calculate rate for a policy. Request data and calculation result are not required to save.	POST	/policies/rates/application	A0020 - newContractRate	policyStructure	newContractRate_request		policyStructure*	newContractRate_response
contract	new	rateOffer	loanStructure	Calculate rate for an offer for a loan based on limited input. Request data and calculation result are not required to save.	POST	/loans/rates/offer	A0022 - newContractRateOffer	loanStructure	newContractRateOffer_request		loanStructure*	newContractRateOffer_response
contract	new	rateOffer	masterAgreementStructure	Calculate rate for an offer for a master agreement. Request data and calculation result are not required to save.	POST	/master-agreements/rates/offer	A0022 - newContractRateOffer	masterAgreementStructure	newContractRateOffer_request		masterAgreementStructure*	newContractRateOffer_response
contract	new	rateOffer	masterAgreementStructure	Calculate rate for an offer for a subcontract of a master agreement. Request data and calculation result are not required to save.	POST	/master-agreements/{masterAgreementId}/rates/offer	A0022 - newContractRateOffer	masterAgreementStructure	newContractRateOffer_request		masterAgreementStructure*	newContractRateOffer_response
contract	new	rateOfferQuick	pensionStructure	Calculate rate for an offer for a pension. Request data and calculation result are not required to save.	POST	/pensions/rates/offer	A0022 - newContractRateOffer	pensionStructure	newContractRateOffer_request		pensionStructure*	newContractRateOffer_response
contract	new	rateOfferQuick	policyStructure	Calculate rate for an offer for a policy. Request data and calculation result are not required to save.	POST	/policies/rates/offer	A0022 - newContractRateOffer	policyStructure	newContractRateOffer_request		policyStructure*	newContractRateOffer_response
contract	new	rateOfferQuick	loanStructure	Calculate rate for an offer for a loan based on limited input. Request data and calculation result are not required to save.	POST	/loans/rates/offer-quick	A0024 - newContractRateOfferQuick	loanStructure	newContractRateOfferQuick_request		loanStructure*	newContractRateOfferQuick_response
contract	new	rateOfferQuick	masterAgreementStructure	Calculate rate for an offer for a master agreement based on limited input. Request data and calculation result are not required to save.	POST	/master-agreements/rates/offer-quick	A0024 - newContractRateOfferQuick	masterAgreementStructure	newContractRateOfferQuick_request		masterAgreementStructure*	newContractRateOfferQuick_response
contract	new	rateOfferQuick	masterAgreementStructure	Calculate rate for an offer for a subcontract of a master agreement based on limited input. Request data and calculation result are not required to save.	POST	/master-agreements/{masterAgreementId}/rates/offer-quick	A0024 - newContractRateOfferQuick	masterAgreementStructure	newContractRateOfferQuick_request		masterAgreementStructure*	newContractRateOfferQuick_response
contract	new	rateOfferQuick	pensionStructure	Calculate rate for an offer for a pension based on limited input. Request data and calculation result are not required to save.	POST	/pensions/rates/offer-quick	A0024 - newContractRateOfferQuick	pensionStructure	newContractRateOfferQuick_request		pensionStructure*	newContractRateOfferQuick_response
contract	new	rateOfferQuick	policyStructure	Calculate rate for an offer for a policy based on limited input. Request data and calculation result are not required to save.	POST	/policies/rates/offer-quick	A0024 - newContractRateOfferQuick	policyStructure	newContractRateOfferQuick_request		policyStructure*	newContractRateOfferQuick_response
contract	new	registration	loanStructure	Registration of a new loan already underwritten.	POST	/loans/registration	A0026 - newContractRegistration	loanStructure	newContractRegistration_request		loanStructure*	newContractRegistration_response
contract	new	registration	masterAgreementStructure	Registration of a new master agreement already underwritten.	POST	/master-agreements/registration	A0026 - newContractRegistration	masterAgreementStructure	newContractRegistration_request		masterAgreementStructure*	newContractRegistration_response
contract	new	registration	masterAgreementStructure	Registration of a new subcontract of an existing master agreement already underwritten.	POST	/master-agreements/{masterAgreementId}/new/registration	A0026 - newContractRegistration	masterAgreementStructure	newContractRegistration_request		masterAgreementStructure*	newContractRegistration_response
contract	new	registration	policyStructure	Registration of a new pension already underwritten.	POST	/pensions/registration	A0026 - newContractRegistration	pensionStructure	newContractRegistration_request		pensionStructure*	newContractRegistration_response
contract	new	registration	policyStructure	Registration of a new policy already underwritten.	POST	/policies/registration	A0026 - newContractRegistration	policyStructure	newContractRegistration_request		policyStructure*	newContractRegistration_response
contract	new	underwrite	masterAgreementStructure	Apply assessment of a request. Based on the data, the organization will assess whether it will be accepted, declined, or requires manual underwriting.	POST	/master-agreements/underwritings/application	A0126 - newContractUnderwrite	masterAgreementStructure	newContractUnderwrite_request		masterAgreementStructure*	newContractUnderwrite_response
contract	new	underwrite	masterAgreementStructure	Apply assessment of a request. Based on the data, the organization will assess whether it will be accepted, declined, or requires manual underwriting.	POST	/master-agreements/{masterAgreementId}/underwritings/application	A0126 - newContractUnderwrite	masterAgreementStructure	newContractUnderwrite_request		masterAgreementStructure*	newContractUnderwrite_response
contract	new	underwrite	policyStructure	Apply assessment of a request. Based on the data, the organization will assess whether it will be accepted, declined, or requires manual underwriting.	POST	/policies/underwritings/application	A0126 - newContractUnderwrite	policyStructure	newContractUnderwrite_request		policyStructure*	newContractUnderwrite_response
contract	new	underwriteOffer	masterAgreementStructure	Apply assessment of an offer. Based on the data, the organization will assess whether it will be accepted, declined, or requires manual underwriting.	POST	/master-agreements/underwritings/offer	A0128 - newContractOfferUnderwrite	masterAgreementStructure	newContractOfferUnderwrite_request		masterAgreementStructure*	newContractOfferUnderwrite_response
contract	new	underwriteOffer	masterAgreementStructure	Apply assessment of an offer. Based on the data, the organization will assess whether it will be accepted, declined, or requires manual underwriting.	POST	/master-agreements/{masterAgreementId}/underwritings/offer	A0128 - newContractOfferUnderwrite	masterAgreementStructure	newContractOfferUnderwrite_request		masterAgreementStructure*	newContractOfferUnderwrite_response
contract	new	underwriteOffer	policyStructure	Apply assessment of an offer. Based on the data, the organization will assess whether it will be accepted, declined, or requires manual underwriting.	POST	/policies/underwritings/offer	A0128 - newContractOfferUnderwrite	policyStructure	newContractOfferUnderwrite_request		policyStructure*	newContractOfferUnderwrite_response
contract	change	<default>	loanStructure	Replace the entire loan by a new version.	PUT	/loans/{loanId}/change	A0050 - changeContract	loanStructure	changeContract_request		loanStructure*	changeContract_response
contract	change	<default>	masterAgreementStructure	Replace the entire master agreement by a new version.	PUT	/master-agreements/{masterAgreementId}/change	A0050 - changeContract	masterAgreementStructure	changeContract_request		masterAgreementStructure*	changeContract_response
contract	change	<default>	masterAgreementStructure	Replace an entire subcontract within a master agreement by a new version.	PUT	/master-agreements/{masterAgreementId}/contracts/{contractId}/change	A0050 - changeContract	masterAgreementStructure	changeContract_request		masterAgreementStructure*	changeContract_response
contract	change	<default>	pensionStructure	Replace the entire pension by a new version.	PUT	/pensions/{pensionId}/change	A0050 - changeContract	pensionStructure	changeContract_request		pensionStructure*	changeContract_response
contract	change	<default>	policyStructure	Replace the entire policy by a new version.	PUT	/policies/{policyId}/change	A0050 - changeContract	policyStructure	changeContract_request		policyStructure*	changeContract_response

contract	change	detail	policyStructure	Apply a partial change to the policy.	PATCH	/policies/{policyId}/detail	A0058 - changeContractDetail	policyStructure	changeContractDetail_request		policyStructure*	changeContractDetail_response
contract	change	offer	loanStructure	An offer for changing an existing loan.	PUT	/loans/{loanId}/offer	A0060 - changeContractOffer	loanStructure	changeContractOffer_request		loanStructure*	changeContractOffer_response
contract	change	offer	masterAgreementStructure	An offer for changing an existing master agreement.	PUT	/master-agreements/{masterAgreementId}/change/offer	A0060 - changeContractOffer	masterAgreementStructure	changeContractOffer_request		masterAgreementStructure*	changeContractOffer_response
contract	change	offer	masterAgreementStructure	An offer for changing an existing subcontract within a master agreement.	PUT	/master-agreements/{masterAgreementId}/contracts/{contractId}/offer	A0060 - changeContractOffer	masterAgreementStructure	changeContractOffer_request		masterAgreementStructure*	changeContractOffer_response
contract	change	offer	pensionStructure	An offer for changing an existing pension.	PUT	/pensions/{pensionId}/offer	A0060 - changeContractOffer	pensionStructure	changeContractOffer_request		pensionStructure*	changeContractOffer_response
contract	change	offer	policyStructure	An offer for changing an existing policy.	PUT	/policies/{policyId}/offer	A0060 - changeContractOffer	policyStructure	changeContractOffer_request		policyStructure*	changeContractOffer_response
contract	change	rate	loanStructure	Calculate rate based on changed loan data. Request data and calculation result are not required to save.	PUT	/loans/{loanId}/rates/change	A0062 - changeContractRate	loanStructure	changeContractRate			

contract	retrieve	claimCoverCheck	masterAgreementStructure	Obtain policy information such as coverage and deductible based on query parameters and/or claim data in the request body.	POST	/master-agreements/{masterAgreementId}/contracts/{contractId}/claim-cover-check	A0098 - retrieveClaimCoverCheck	claimStructure	retrieveClaimCoverCheck_request	fields={attribute} filter={attribute}{operator}{valueAttribute} sort={attribute}	masterAgreementStructure	retrieveClaimCoverCheck_response
contract	retrieve	documentList	loanStructure	Retrieve all available documents within a loan according to a query statement. When no query statement is given all documents are returned. When no fields are given only the documentId is returned. When a query statement is given and there's no data the HTTP status 204 No Content is returned.	GET	/loans/{loanId}/documents/list	A0085 - retrieveContractDocumentList			fields={attribute} filter={attribute}{operator}{valueAttribute} sort={attribute}	loanStructure	retrieveContractDocumentList_response
contract	retrieve	documentList	masterAgreementStructure	Retrieve all available documents within a master agreement according to a query statement. When no query statement is given all documents are returned. When no fields are given only the documentId is returned. When a query statement is given and there's no data the HTTP status 204 No Content is returned.	GET	/master-agreements/{masterAgreementId}/documents/list	A0085 - retrieveContractDocumentList			fields={attribute} filter={attribute}{operator}{valueAttribute} sort={attribute}	masterAgreementStructure	retrieveContractDocumentList_response
contract	retrieve	documentList	pensionStructure	Retrieve all available documents within a pension according to a query statement. When no query statement is given all documents are returned. When no fields are given only the documentId is returned. When a query statement is given and there's no data the HTTP status 204 No Content is returned.	GET	/pensions/{pensionId}/documents/list	A0085 - retrieveContractDocumentList			fields={attribute} filter={attribute}{operator}{valueAttribute} sort={attribute}	pensionStructure	retrieveContractDocumentList_response
contract	retrieve	documentList	policyStructure	Retrieve all available documents within a policy according to a query statement. When no query statement is given all documents are returned. When no fields are given only the documentId is returned. When a query statement is given and there's no data the HTTP status 204 No Content is returned.	GET	/policies/{policyId}/documents/list	A0085 - retrieveContractDocumentList			fields={attribute} filter={attribute}{operator}{valueAttribute} sort={attribute}	policyStructure	retrieveContractDocumentList_response
contract	retrieve	documentRange	loanStructure	[DEPRECATED] This variant is not in use anymore. Please use documentList instead. (Obtain details of multiple documents based on a range of unique references.)	GET	/loans/{loanId}/documents/range	A0089 - retrieveContractDocumentRange			documents={documentId}	loanStructure	retrieveContractDocumentRange_response
contract	retrieve	documentRange	masterAgreementStructure	[DEPRECATED] This variant is not in use anymore. Please use documentList instead. Obtain details of multiple documents based on a range of unique references.	GET	/master-agreements/{masterAgreementId}/documents/range	A0089 - retrieveContractDocumentRange			contractNumber={contractId} documents={documentId}	masterAgreementStructure	retrieveContractDocumentRange_response
contract	retrieve	documentRange	pensionStructure	[DEPRECATED] This variant is not in use anymore. Please use documentList instead. Obtain details of multiple documents based on a range of unique references.	GET	/pensions/{pensionId}/documents/range	A0089 - retrieveContractDocumentRange			documents={documentId}	pensionStructure	retrieveContractDocumentRange_response
contract	retrieve	documentRange	policyStructure	Obtain details of multiple documents based on a range of unique references.	GET	/policies/{policyId}/documents/range	A0089 - retrieveContractDocumentRange			documents={documentId}	policyStructure	retrieveContractDocumentRange_response
contract	retrieve	invoiceList	masterAgreementStructure	Retrieve all available invoices for a masterAgreement according to a query statement. When no query statement is given the HTTP status 412 Precondition failed is returned. When a query statement is given and there's no data the HTTP status 204 No Content is returned.	GET	/master-agreements/{masterAgreementId}/financial-informations/list	A0094 - retrieveContractInvoiceList			fields={attribute} filter={entityType=invoice} filter={attribute}{operator}{valueAttribute}	masterAgreementStructure	retrieveContractInvoiceList_response
contract	retrieve	invoiceList	policyStructure	Retrieve all available invoices according to a query statement. When no query statement is given the HTTP status 412 Precondition failed is returned. When a query statement is given and there's no data the HTTP status 204 No Content is returned.	GET	/policies/{policyId}/financial-informations/list	A0094 - retrieveContractInvoiceList			fields={attribute} filter={entityType=invoice} filter={attribute}{operator}{valueAttribute}	policyStructure	retrieveContractInvoiceList_response
contract	retrieve	list	loanStructure	Retrieve a list of all available contracts within a loan according to a query statement. When no query statement is given the HTTP status 412 Precondition failed is returned. When a query statement is given and there's no data the HTTP status 204 No Content is returned.	GET	/loans/list	A0082 - retrieveContractList			fields={attribute} filter={attribute}{operator}{valueAttribute}	loanStructure	retrieveContractList_response
contract	retrieve	list	masterAgreementStructure	Retrieve a list of all available masterAgreements according to a query statement. When no query statement is given all policies within the masterAgreement is returned. When a query statement is given and there's no data the HTTP status 204 No Content is returned.	GET	/master-agreements/list	A0082 - retrieveContractList			fields={attribute} filter={attribute}{operator}{valueAttribute}	masterAgreementStructure	retrieveContractList_response
contract	retrieve	list	masterAgreementStructure	Retrieve a list of all available contracts within a master agreement according to a query statement. When no query statement is given all policies within the masterAgreement is returned. When a query statement is given and there's no data the HTTP status 204 No Content is returned.	GET	/master-agreements/{masterAgreementId}/list	A0082 - retrieveContractList			fields={attribute} filter={attribute}{operator}{valueAttribute}	masterAgreementStructure	retrieveContractList_response
contract	retrieve	list	pensionStructure	Retrieve a list of all available contracts within a pension according to a query statement. When no query statement is given the HTTP status 412 Precondition failed is returned. When a query statement is given and there's no data the HTTP status 204 No Content is returned.	GET	/pensions/list	A0082 - retrieveContractList			fields={attribute} filter={attribute}{operator}{valueAttribute}	pensionStructure	retrieveContractList_response
contract	retrieve	list	policyStructure	Retrieve a list of all available contracts within a policy according to a query statement. When no query statement is given the HTTP status 412 Precondition failed is returned. When a query statement is given and there's no data the HTTP status 204 No Content is returned.	GET	/policies/list	A0082 - retrieveContractList			fields={attribute} filter={attribute}{operator}{valueAttribute}	policyStructure	retrieveContractList_response
